How to Find a Journal by Name

You may have a citation to an article and need to find the full-text of that article. Or you may want to see which database has a particular journal. To find out if the library has a journal online, go to the Cornette Library home page at http://www.wtamu.edu/library/

Click on Selected Library Links → Journals, A-Z (Online and Print)

You will be searching the names of journals—not the articles inside the journals.
Type in the name of a journal, such as journal of medical speech-language pathology
Click the Starts With button. Click Go.

Then click the SFX button by the desired title.

You may see that the full text is available online in a database. Or you may see a link to the Cornette Library Catalog, if the library had/has a subscription to the journal.
Searching For One Article

If you have a citation for an article you need, *Journals, A-Z (Online and Print)* will often take you to a list that may be browsed by year, then by issue.

For example, you may want to find the article “The Effects of Two Speech Interventions on Speech Function in Pediatric Dysarthria.” It is in volume 20, issue 4 (December 2012) of the *Journal of Medical Speech-Language Pathology*.

Search the title of the journal and click the button for *Starts with*. Click *GO*.

**Title:** The effects of two speech interventions on speech function in pediatric dysarthria

**Author(s):** Erika S. Levy, Lorraine O. Ramig, and Stephen M. Camarata

**Source:** *Journal of Medical Speech-Language Pathology*, 20.4 (Dec. 2012): p82.

If the title of the journal is listed, click on its SFX button.
If the journal is available online in a database, click the link.

TIP: this screen will look different in each database.

Select the year and then the issue that you need. In this case, the citation was for: Volume 20, issue 4 (December 2012)
Browse the issue for the article you need. Articles are in order by page number in each issue.

Please note that browsing in other databases may look very different. Here is an example of the journal *Dysphagia* in the SpringerLink database.
In the SpringerLink database, click on Download PDF to view the full text of an article.

Use the print icon to print the PDF.

Dysphagia 11:2-8 (1996)

Influence of Cold Stimulation on the Normal Pharyngeal Swallow Response

Galib N. Ali, DSM, FRACP, Tina M. Lawford, BS, Karen L. Wallace, BS, David J. deCarle, MB, BS, FRACP, and Ian J.S. Cook, MD, FRACP
Department of Gastroenterology, The St George Hospital, University of New South Wales, Sydney, New South Wales, Australia

Abstract: We examined the potential influence of cold on the normal pharyngeal swallow response...
Here is another example of how browsing a journal in other databases will look different. This example is from an EBSCO database, Academic Search Complete.

NOTE: A WTAMU student using a library computer may print for “free.” If you login using your Buff Advisor username and password, the pages are deducted from your WT student allotment of 1,500 free pages per semester.
Searching For Any Articles in One Journal

Perhaps you are interested in looking generally at the articles in a particular journal, such as *Aphasiology*. This technique will help you to determine if the journal is available in a database and how to search it.

Search the journal title. If it is listed, click on its SFX button.

It is available in the database Communication & Mass Media Complete.
Go to the library home page [http://www.wtamu.edu/library/](http://www.wtamu.edu/library/) and click on the link to All Databases.

Scroll the alphabetical list. Click on the name of the database, such as **Communication & Mass Media Complete**.
For example, in an EBSCO database such as Communication & Mass Media Complete:

Search for **aphasiology** in *SO Publication Name*

TIP: Be sure to type a phrase in quotation marks: “International Journal of Language Studies”

You can then search for articles in the journal by adding search terms.

Search for: **Aphasiology** in *SO Publication Name*
AND
**“bilingual aphasia”** in Select a Field (optional)
