NIST CONTROL FAMILY
CONFIGURATION MANAGEMENT CONTROLS

CONTROL NUMBER	CONTROL NAME	PRIORITY	REVIEW DATE
CM-2	Baseline Configuration	P1	07/09/2017

I. STATEMENT

West Texas A&M University must develop, document, and maintain a current baseline configuration of its information systems. Baseline configurations must be updated when new configurations are needed.

II. APPLICABILITY

This Control applies to all West Texas A&M network information resources. The intended audience for this Control includes all information resource owners, custodians, and users of information resources.

III. IMPLEMENTATION

Information system owners must develop, document, and maintain a current baseline configuration. New systems and changes to existing systems must go through a security risk assessment, during this process IT security personnel will ensure the system has a baseline configuration.
