

**The Division of Information Technology
University Information Security Standards**

**NIST CONTROL FAMILY
IDENTIFICATION AND AUTHENTICATION CONTROLS**

CONTROL NUMBER	CONTROL NAME	PRIORITY	REVIEW DATE
SC-13	Cryptographic Protection	P1	07/23/2017

I. STATEMENT

The University information system implements cryptography required for each use in accordance with applicable federal laws, Executive Orders, directives, policies, regulations, and standards.

II. APPLICABILITY

This Control applies to all West Texas A&M network information resources. The intended audience for this Control includes all information resource owners, custodians, and users of information resources.

III. IMPLEMENTATION

Confidential information being stored on portable devices, removable media or non-University owned systems (including cloud or SAS vendors) shall be encrypted with a minimum of a 128-bit algorithm. The encryption of sensitive but non-confidential data stored on portable devices, removable media or non-University owned systems (including cloud or SAS vendors) will be based on risk management decisions.
