

West Texas A&M University

About This Report

About Your Engagement Indicators Report

Engagement Indicators (EIs) provide a useful summary of the detailed information contained in your students' NSSE responses. By combining responses to related NSSE questions, each EI offers valuable information about a distinct aspect of student engagement. Ten indicators, based on three to eight survey questions each (a total of 47 survey questions), are organized into four broad themes as shown at right.

| Theme | Engagement Indicator |
|--------------------------|-----------------------------------|
| | Higher-Order Learning |
| Academic Challenge | Reflective & Integrative Learning |
| | Learning Strategies |
| | Quantitative Reasoning |
| | Collaborative Learning |
| Learning with Peers | Discussions with Diverse Others |
| | Discussions with Diverse others |
| Experiences with Faculty | Student-Faculty Interaction |
| | Effective Teaching Practices |
| | Overlite of lateractic ac |
| Campus Environment | Quality of Interactions |
| | Supportive Environment |

Report Sections

Overview (p. 3)

Displays how average EI scores for your students compare with those of students at your comparison group institutions.

Theme Reports (pp. 4-13)

Detailed views of EI scores within the four themes for your students and those at comparison group institutions. Three views offer varied insights into your EI scores:

Mean Comparisons

Straightforward comparisons of average scores between your students and those at comparison group institutions, with tests of significance and effect sizes (see below).

Score Distributions

Box-and-whisker charts show the variation in scores *within* your institution and comparison groups.

Performance on Indicator Items

Responses to each item in a given EI are summarized for your institution and comparison groups.

Comparisons with High-Performing Institutions (p. 15) Comparisons of your students' average scores on each EI with those of students at institutions whose average scores were in the top 50% and top 10% of 2020 and 2021 participating institutions.

Detailed Statistics (pp. 16-19)

Detailed information about EI score means, distributions, and tests of statistical significance.

Interpreting Comparisons

Mean comparisons report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2018). Comparisons with an effect size of at least .3 in magnitude (before rounding) are highlighted in the Overview (p. 3).

Els vary more among students within an institution than between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how El scores vary among your students and those in your comparison groups. Your NSSE Tableau dashboards and Report Builder (released in the fall) offer valuable perspectives on internal variation and help you investigate your students' engagement in depth.

How Engagement Indicators are Computed

Each EI is scored on a 60-point scale. To produce an indicator score, the response set for each item is converted to a 60-point scale (e.g., Never = 0; Sometimes = 20; Often = 40; Very often = 60), and the rescaled items are averaged. Thus a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

For more information on EIs and their psychometric properties, refer to the NSSE website: nsse.indiana.edu

Rocconi, L.M., & Gonyea, R.M. (2018). Contextualizing effect sizes in the National Survey of Student Engagement: An empirical analysis. *Research & Practice in Assessment, 13* (Summer/Fall), pp. 22-38.

Overview

West Texas A&M University

Engagement Indicators: Overview

Engagement Indicators are summary measures based on sets of NSSE questions examining key dimensions of student engagement. The ten indicators are organized within four broad themes: Academic Challenge, Learning with Peers, Experiences with Faculty, and Campus Environment. The tables below compare average scores for your students with those in your comparison groups.

Use the following key:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- \triangle Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.
- -- No significant difference.
- ∇ Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Your students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

Academic Challenge

West Texas A&M University

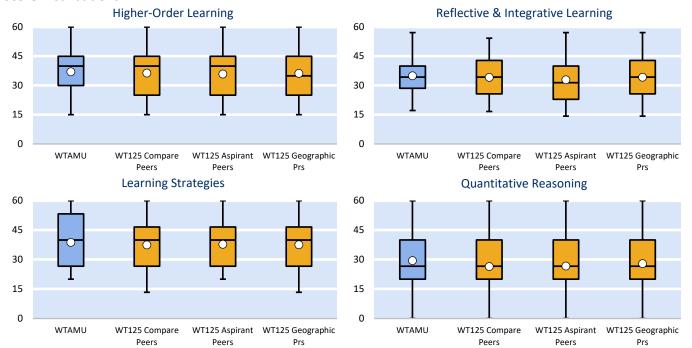

Academic Challenge: First-year students

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: *Higher-Order Learning, Reflective & Integrative Learning, Learning Strategies*, and *Quantitative Reasoning*. Below and on the next page are three views of your results alongside those of your comparison groups.

| Mean Comparisons | | Your first-year students compared with | | | | | | | |
|-----------------------------------|---------------------------|--|-----------|--------------|----------------------|------|--------|--|--|
| | WTAMU WT125 Compare Peers | | WT125 Asp | oirant Peers | WT125 Geographic Prs | | | | |
| | | | Effect | | Effect | | Effect | | |
| Engagement Indicator | Mean | Mean | size | Mean | size | Mean | size | | |
| Higher-Order Learning | 37.0 | 36.4 | .04 | 36.0 | .08 | 36.2 | .06 | | |
| Reflective & Integrative Learning | 35.0 | 34.2 | .07 | 32.9 * | .17 | 34.3 | .06 | | |
| Learning Strategies | 38.7 | 37.5 | .09 | 37.8 | .07 | 37.6 | .08 | | |
| Quantitative Reasoning | 29.5 | 26.5 ** | .20 | 26.7 * | .18 | 27.9 | .11 | | |

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; *p < .05, **p < .01, ***p < .01 (2-tailed).

Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

Performance on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.

| | | Percentage point of | difference ^a between yo | our FY students and |
|---|-------|---------------------|------------------------------------|---------------------|
| Higher-Order Learning | | WT125 | WT125 Aspirant | WT125 |
| 9 | WTAMU | Compare Peers | Peers | Geographic Pr |
| Percentage responding "Very much" or "Quite a bit" about how much coursework emphasized | % | | | |
| 4b. Applying facts, theories, or methods to practical problems or new situations | 66 | +2 | +2 | +1 |
| 4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts | 67 | +4 | +2 | +4 |
| 4d. Evaluating a point of view, decision, or information source | 68 | +1 | +2 | +1 |
| 4e. Forming a new idea or understanding from various pieces of information | 74 | +9 | +8 | +7 |
| Reflective & Integrative Learning | | | | |
| Percentage of students who responded that they "Very often" or "Often" | | | | |
| 2a. Combined ideas from different courses when completing assignments | 53 | +7 | +9 | +5 |
| 2b. Connected your learning to societal problems or issues | 49 | -2 | +3 | +2 |
| Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments | 47 | -3 | +1 | -0 |
| 2d. Examined the strengths and weaknesses of your own views on a topic or issue | 64 | +3 | +4 | +3 |
| Tried to better understand someone else's views by imagining how an issue looks from his or her perspective | 72 | +4 | +6 | +3 |
| 2f. Learned something that changed the way you understand an issue or concept | 71 | +8 | +12 | +7 |
| 2g. Connected ideas from your courses to your prior experiences and knowledge | 79 | +4 | +10 | +6 |
| Learning Strategies | | | | |
| Percentage of students who responded that they "Very often" or "Often" | | | | |
| 9a. Identified key information from reading assignments | 69 | -2 | +2 | -1 |
| 9b. Reviewed your notes after class | 72 | +10 | +2 | +4 |
| 9c. Summarized what you learned in class or from course materials | 67 | +5 | +5 | +4 |
| Quantitative Reasoning | | | | |
| Percentage of students who responded that they "Very often" or "Often" | | | | |
| Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.) | 53 | +4 | +2 | +1 |
| Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.) | 46 | +8 | +10 | +5 |
| 6c. Evaluated what others have concluded from numerical information | 44 | +11 | +10 | +7 |
| | | | | |

a. Percentage point difference = Institution percentage—Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

| 9b. Reviewed your notes after class | 69 | +3 | +1 | | +1 | |
| 9c. Summarized what you learned in class or from course materials | 71 | +6 | +3 |) | +3 | |
| Quantitative Reasoning | | | | | | |
| Percentage of students who responded that they "Very often" or "Often" | | | | | | |
| Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.) | 58 | +5 | +6 | | +4 | |
| Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.) | 52 | +7 | +9 | | +7 | |
| 6c. Evaluated what others have concluded from numerical information | 43 | +0 | +1 |] | +0 | |

a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

Learning with Peers

West Texas A&M University

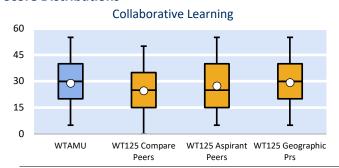

Learning with Peers: First-year students

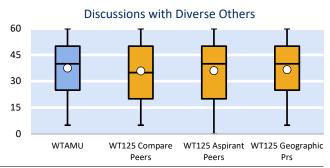

Collaborating with others in mastering difficult material and developing interpersonal and social competence prepare students to deal with complex, unscripted problems they will encounter during and after college. Two Engagement Indicators make up this theme: *Collaborative Learning* and *Discussions with Diverse Others*. Below are three views of your results alongside those of your comparison groups.

| Mean Comparisons | | | Your fi | rst-year stude | nts compared wi | ith | |

Experiences with Faculty

West Texas A&M University

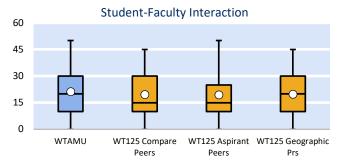

Experiences with Faculty: First-year students

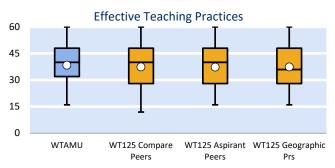

Students learn firsthand how experts think about and solve problems by interacting with faculty members inside and outside of instructional settings. As a result, faculty become role models, mentors, and guides for lifelong learning. In addition, effective teaching requires that faculty deliver course material and provide feedback in student-centered ways. Two Engagement Indicators investigate this theme: *Student-Faculty Interaction* and *Effective Teaching Practices*. Below are three views of your results alongside those of your comparison groups.

| Mean Comparisons | | | Your fi | rst-year stude | nts compared wi | ith | |

a. Percentage point difference = Institution percentage—Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

Campus Environment

West Texas A&M University

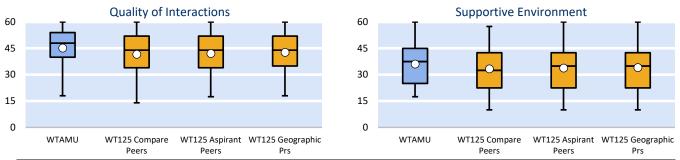

Campus Environment: First-year students

Students benefit and are more satisfied in supportive settings that cultivate positive relationships among students, faculty, and staff. Two Engagement Indicators investigate this theme: *Quality of Interactions* and *Supportive Environment*. Below are three views of your results alongside those of your comparison groups.

| Mean Comparisons | | Your | first-year students compared w | ith |
|-------------------------|-------|---------------------|--------------------------------|----------------------|
| | WTAMU | WT125 Compare Peers | WT125 Aspirant Peers | WT125 Geographic Prs |
| | | Effect | Effect | Effect |
| Engagement Indicator | Mean | Mean size | Mean size | Mean size |
| Quality of Interactions | 45.1 | 41.6 *** .26 | 42.0 ** .25 | 42.6 ** .20 |
| Supportive Environment | 36.0 | 33.3 ** .19 | 33.7 * .16 | 34.0 * .14 |

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; *p < .05, **p < .01, ***p < .001 (2-tailed).

Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

Performance on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.

Comparisons with High-Performing Institutions West Texas A&M University

Comparisons with Top 50% and Top 10% Institutions

While NSSE's policy is not to rank institutions (see **go.iu.edu/NSSE-PnP**), the results below are designed to compare the engagement of your students with those attending two groups of institutions identified by NSSE a for their high average levels of student engagement:

- (a) institutions with average scores placing them in the top 50% of all 2020 and 2021 NSSE institutions, and
- (b) institutions with average scores placing them in the top 10% of all 2020 and 2021 NSSE institutions.

While the average scores for most institutions are below the mean for the top 50% or top 10%, your institution may show areas of distinction where your average student was as engaged as (or even more engaged than) the typical student at high-performing institutions. A check mark (\checkmark) signifies those comparisons where your average score was at least comparable to that of the high-performing group. However, the presence of a check mark does not necessarily mean that your institution was a member of that group.

It should be noted that most of the variability in student engagement is within, not between, institutions. Even "high-performing" institutions have students with engagement levels below the average for all institutions.

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by the pooled standard deviation; *p < .05, **p < .01, ***p < .001 (2-tailed).

a. Precision-weighted means were used to determine the top 50% and top 10% institutions for each Engagement Indicator from all NSSE 2020 and 2021 institutions, separately by class. Using this method, Engagement Indicator scores of institutions with relatively large standard errors were adjusted toward the mean of all students, while those with smaller standard errors received smaller corrections. As a result, schools with less stable data—even those with high average scores—may not be among the top scorers. NSSE does not publish the names of the top 50% and top 10% institutions because of our commitment not to release institutional results and our policy against ranking institutions.

b. Check marks are assigned to comparisons that are either significant and positive, or non-significant with an effect size > -10.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean +/- 1.96 x SE) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean \pm 1.96 x SE) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.
