Summer

SOCW 6310: Advanced Social Policy (Asynchronous)

SOCW 6398: Applied Social Work Practice II (Synchronous- Field Practicum)

Free Elective##

Fall

SOCW 6305: Integrative Seminar (Synchronous)

SOCW 6399: Applied Social Work Practice III (Synchronous- Field Practicum)

Free Elective##

December (fall) Graduation!

Notes:

Students could enroll in free electives any semester of the program. Free Electives means that students have complete control over what class they would like to enroll as long as it's a graduate level course (5000 or 6000 level) and NOT a repeat of an undergraduate course. For example, if you had taken Diversity as an undergraduate course, you would not be able to claim it as an elective during your graduate education. This is your time to explore Chemistry if you'd like!

We would highly suggest taking both your free electives over Summer I and II; this would free you up during your last semester which can be intensive.

*Synchronous virtual classrooms operate much like traditional classrooms, with set study schedules and live discussions.

Asynchronous classrooms look a little different, as students digest the instruction and communicate with each other on their own time with regularly scheduled assignments and activities.

###Students complete 500 hours of advanced field practicum.

###Advanced Standing Program: 36 hours Total Program (with Foundation: 62 hours)
