The importance of networking while in college

WT College Assistance
Migrant Program
WEST TEXAS A&M UNIVERSITY™

Building an effective professional network is important for career development, as it can provide growth opportunities or opportunities for a new career path. Fortunately, college students can begin networking with fellow students, alumni and faculty members before starting their careers. Understanding how to effectively network in college can help you find an internship or a job after graduation. The best way to start networking as a college student is by being active in the student life: participate at events, join organizations, and use the campus resources.

5 tips to be successful at WT (from Filiberto Avila, CAMP Alumni '22):

1. Network as often as possible.
2. Make genuine connections with your professors.
3. Ask questions - even when you already know the answer.
4. Set out to make a difference.
5. Reflect on the opportunities you have been given.
