❖ **Please indicate your preferred area of interest and desired advisor for possible research interests:**

Dr. Gary Byrd - broad interests and experience. He selects research projects that are designed to enhance graduate students' entrance into doctoral programs in any specialization.

Dr. Maxine De Butte - the role of hormones such as estrogen on ischemic brain injury. She is continuing her research using rodent models of global ischemia to develop and improve neuroprotective strategies aimed at reducing brain injury and improving functional recovery.

Dr. Ashley Pinkham - supporting low-income children's language acquisition and literacy development. She is particularly interested in the extent to which broadening young children's general knowledge base can help support their oral language and reading skills.

Dr. Danney Rasco - how others or the perceptions of others influence thoughts, feelings, and behavior. He is particularly interested in how individuals interact in romantic relationships and how romantic relationships impact happiness and life satisfaction.

Dr. Mun Yee Kwan - eating disorders and suicidal behaviors. She focuses on interpersonal functioning as it pertains to these two clinical phenomena. Her clinical experiences include depression, anxiety, bipolar disorder, eating disorders, personality, etc.

Dr. Kenneth Denton - school psychology and supporting the well-being of children in educational agencies as systems. He is particularly interested in the role and perceptions of teachers and their interactions with students.

Is there any further information you would like to share with the admission committee? For example, if you feel your GRE scores or your grades are not an adequate reflection of your ability to do graduate work, please explain.
