

## Reverse Transfer

WTAMU courses can transfer back to Texas community colleges.

### Why is this important?

If you apply to WTAMU before you finish your associate's degree, but would still like to earn the degree, you can complete your degree requirements at WTAMU and then receive your associate's from your two-year college.

### What is the process?

For most students, you will simply to need to complete the following steps.

1. Complete the appropriate courses needed at WTAMU.
2. Request a transcript be sent to your community college - <http://wtamu.edu/administration/registrar-transcripts.aspx>
3. Apply for graduation at your community college.

Note: Some community colleges may have specific course or residency requirements, so please discuss reverse transfer with an academic advisor at your community college.
